

EVERYTHING FLOWS INTO THE LAGOON

Protect our environment!

Everything that occurs within the watershed of this urban area will have an effect on the lagoon and its inhabitants.

- 1** Never pour cleaners, motor oil, or other hazardous waste down the drain or storm drain.
- 2** Limit use of fertilizers and pesticides, they affect the plants and algae in the lagoon.
- 3** Keep a natural buffer around creeks and wetlands to help filter pollution and protect the lagoon.

Did You Know: Colwood Creek runs all the way from Glen Lake into the lagoon.
